

Regular Givers to DDRC Healthcare

**We value our regular givers who kindly
support our charitable work.**

Most of the treatment we provide is funded by the NHS but we also need to fund our wider charitable objectives - to conduct research into the many applications of Hyperbaric Oxygen (HBO), diving environments and diving physiology. This was at the centre of our origins in 1980 as the 'Diving Diseases Research Centre'.

We conduct ongoing research to ensure that patients can access the most effective treatments possible.

In addition to treatment and research, we also provide diver safety education, 'Fitness to Dive' advice and we answer all calls to the 24/7 National Diving Accident Helpline.

DDRC Healthcare is a world leader in the provision of effective HBO therapy as a supplement to medical, surgical and oncology services, particularly in the maxillo-facial and oral surgery specialities.

HBO is providing new applications of an established technology to help resolve certain difficult, expensive or sometimes otherwise hopeless medical conditions, e.g.:

- Decompression illness ('the bends')
- Air or gas embolism
- Gas gangrene
- Carbon monoxide poisoning
- Healing problem wounds such as diabetic foot ulcers and skin grafts
- Necrotising soft tissue infections
- Osteomyelitis
- Delayed radiation injury following cancer treatment

Our 24/7 emergency advice line and treatment service supports people with decompression illness, carbon monoxide poisoning, smoke inhalation, cyanide poisoning and soft tissue infections.

Friends of DDRC Healthcare Application Form

Suggested donation of £25.00 per year or £5 per month

Please complete and send to DDRC Healthcare, at the address below.
